Response to Arguments

1. Applicant's arguments with respect to claims 1-13 have been considered but are moot in view of the new ground(s) of rejection.

DETAILED ACTION

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hentilä et al (US006044259A) in view of Donovan et al (US005903726A).

Per claim 1, 7, and 8, 13, Hentilä discloses that a method and system for a telecommunication system comprising:

An intelligent network or a connection to an intelligent network (see figure 3 and column 6 and lines 17-45;

First means for generating a communication charging file (see column 4 and lines 43-56);

Memory for maintaining the account data of the intelligent network subscriber (see column 3 and lines 27-39);

Second means for retrieving the communication bill of the intelligent network subscriber from the charging file and update means responsive to the second means for updating the account data of the intelligent network subscriber with the message communication bill (see column 4 and lines 34-56).

Hentilä doesn't teach that the message communication includes one or more messages sent from or to a mobile station without setting up an end-to-end connection.

Donovan discloses that short messages that sent from or to a mobile station is charged and recorded in a billing system, such short messages delivering service doesn't require the setting up of the end-to-end connection (see column 7 and lines 8-15).

It would have been obvious to one ordinary skill in the art at the time the invention was made to combine the teaching of Donovan with Hentilä such that wireless carrier provider would be profited from such special service.

Per claims 2, 9, Hentilä further discloses that the subscriber is a subscriber using prepaid connection time; a limited value is set for credit data; after an update, a check is made to see if the account data is bigger than the limited value, and if the account data is smaller than the limit value, the user of chargeable message communication services is blocked from the subscriber (see figure 5 and column 8 and lines 1-29).

Per claims 3, 11, Hentilä further teaches that the communication bill retrieval and account data update is performed at predefined intervals (see column 4 and lines 15-20).

Per claims 4-6, 12, Hentilä further teaches the account data of the subscriber is maintained in the intelligent network by maintaining a first set of account data on the subscriber's balance and a second set of account data for charging the balance, the account data of the subscriber is updated in two stages (see figure 4 and items 415, 420), wherein the execution time for each stages is purely arbitrary.

Per claim 10, Hentilä further teaches that as a response to the information blocks the transmission of communication from said subscriber (see figure 5).

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
